- Social Media - Writing tweets and creating instagram posts
- Services - Resume reviews, nutrition plans, coaching plans
- Ethics - Ethical AI

Generative AI mindset

- Generative AI acts like a force multiplier. It is similar to employing an army of bots to do the work for you. This does not mean you can just sit back and watch the money come in. Think of yourself as the manager of these bots, as they create content for you it is up to you to decide what to do with this content in order to generate the most revenue for you.
- If AI can generate realistic photos for you, think about it as, “on what medium can I market this content in order to get the biggest return” by thinking this way it’s immediately obvious that creating merchandise or selling the digital artwork is the best way to generate income.

Be careful of

- Generative AI is not a magic bullet, there is still strategic work that is needed to make the outputs of ChatGPT and other generative AI useful to make money
- Grifters claiming that Generative AI is an easy path to wealth.
